

Orlando World Center Marriott

Cloward H₂O collaborated with the respected design firms EDSA and TVS in the renovation of the entire amenity deck and pools at the World Center Marriott. We were engaged to re-engineer the Iconic Falls Pool, Grotto and Tradewind spas including a complete upgrade to water treatment and circulation systems, bringing the pools current to all applicable code requirements.

The award winning renovation added a Zero-Entry Kid's aquatic area and multi-slide attraction tower. The Kid's pool features an interactive water garden with water cannons and a water slide. The new slide tower offers guests access to two 200-foot twisting water slides and one 90-foot steep drop thrill slide.

With these exciting changes and amazing additions, the resort is an invigorating family destination and part of a memorable vacation experience!
