

GEYSER FALLS WATERPARK - CHOCTAW, MISSISSIPPI

GEYSER FALLS WATERPARK

Geyser Falls Water Theme Park is the newest addition to the Pearl River Resort in Choctaw, Mississippi. The theme for this park is based on a Choctaw Indian Legend of a magical land of gushing geysers and roaring waterfalls.

The park includes a wave pool, lazy river, 12 slides and waterfalls supplied by an endless source of water from a mythical volcano. Additional features include: a four story water play factory, a tot's water play area with over 350 custom jets, Backsplash! - the first slide of its kind in the United States, and Geysers Flats, with its bubbling pools, steaming vents and geysers that erupt as high as 40 feet in the air.

CLOWARD H₂O provided full engineering design services for the park including site civil, electrical and mechanical engineering as well as engineering for all water features.
