

LILY PAD SPRAY PARK - MONTGOMERY, TEXAS

LILY PAD SPRAY PARK

Hidden within a grove of oak trees, this multi-fountain spray park is the perfect place for your family to cool off from the Texas heat. Designed to incorporate the elements of nature, Lily Pad spray park is comprised of log bridges, bronze frogs throughout, a creek that is surrounded by spray features and flower sculptures that have a bit of a squirt to them.

CLOWARD H₂O was commissioned to design and engineer the mechanical and filtration systems along with site layout and site piping for the flower plaza, interactive stream and frog pond.
